

Dear Sirs & Madams

To allow a few media giants to control the airwaves is just one more step in the wrong direction for the US. Please don't change the laws that protect the people from the insidious grasp of idiots like Rupert Murdoch. Clearchannel has ruined radio and the music business with its uninspired songlists, its boycotts, its fascist programming. Television is perilously close to this with legislation changes encouraged by Michael Powell. Again I urge you to reject these changes that limit the people's access to information to diverse sources.

Sincerely,
